CHITTURI SWAROOP

Andhra Pradesh, India
+91 7680020469 swaroopch1234@gmail.com swaroop-chitturi ChSwaroop

SKILLS

Languages: Java, Python, Go (Golang), C, TypeScript, JavaScript, SQL, Dart
Systems & CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, System Design
Backend: REST APIs, JSON, Microservices, gRPC, Node.js, Express, Go
Databases & Storage: PostgreSQL, MongoDB, MySQL, Redis, Supabase, Firebase
Frontend: React, Next.js, TypeScript, TanStack Query, Zustand, Tailwind CSS, HTML, CSS, Responsive Design, Design Systems
Tools & DevOps: Git, Docker, Kubernetes, Jsonnet, Grafana Tanka, k9s
AI & LLMs: LLM Integration, AI Agents & Tool-Use, Prompt Engineering, Retrieval-Augmented Generation (RAG)

EXPERIENCE

Deeptaai — August 2025 – Present

Software Engineer I

- Designed and built full-stack features end-to-end across React/TypeScript frontends and Go backend services for a multi-tenant application management platform and a large-scale analytics platform, shipping from broadly defined problems in weekly agile cycles.
- Implemented role-based access control with custom roles and per-module permissions, along with per-tenant configuration and fee management across multiple client organizations.
- Developed a React SDK for a no-code form builder that lets admins create multi-stage forms with document uploads, including the frontend of an embedded payment step.
- Built Go REST APIs and the matching dashboards for payment renewal and referral incentive workflows, and added critical steps to core application review workflows.
- Developed customer-facing analytics dashboards on REST/microservice APIs serving query results over large event datasets, optimizing data-heavy views with memoization and virtualization to stay responsive at production scale.
- Collaborated cross-functionally with product, design, and QA in code and design reviews focused on correctness, testability, and efficiency; debugged and resolved production issues across frontend, backend, and datastore layers.

Apxor Technology Solutions — October 2024 – July 2025

Associate Software Development Engineer

- Engineered full-stack features across React frontend and Go backend services, contributing to scalable, customer-facing web applications used by product analytics customers.
- Built reusable UI components and REST integrations against internal backend services, accelerating feature delivery across product modules in an agile team environment.
- Built the Flutter mobile app and contributed to the Go backend of a community Q&A platform for education and career guidance.
- Early adopter of LLM tooling on the team – prototyped OpenAI/Gemini integrations, prompt engineering, and RAG patterns, and brought findings back into product and engineering discussions.

Workbees Technologies — April 2024 – September 2024

Software Engineering Intern (Mobile)

- Shipped cross-platform mobile application features using Flutter/Dart, including UI implementation and integration with backend REST services and authentication.
- Collaborated with senior engineers and designers to translate ambiguous product requirements into working features, participating in code reviews and troubleshooting sessions.

PROJECTS

Trello Clone – Full-Stack Kanban Platform | *React, TypeScript, Node.js, Express, PostgreSQL, Supabase* **demo-link**

- Architected and shipped a full-stack Kanban project management platform end-to-end with a React/TypeScript client and a Node.js/Express REST service on PostgreSQL, supporting board, list, and card management with real-time UI updates via TanStack Query and Zustand.
- Implemented drag-and-drop reordering for lists/cards with efficient ordering algorithms, along with labels, due dates, checklists, member assignments, comments, and activity tracking.
- Modeled scalable REST APIs with normalized PostgreSQL schemas and Supabase object storage for file attachments, plus filtering and search across boards.

Skill Share Hub – Skill-Sharing & Mentorship App | *Flutter, Dart, Node.js, Express, MongoDB, Firebase*

- Delivered a full-stack skill-sharing mobile application end-to-end – Flutter frontend, Node.js/Express REST APIs, MongoDB, and Firebase for real-time services – letting users discover peers and connect over shared skill interests.
- Rolled out LinkedIn-style user-to-user connections and a real-time one-to-one chat and voice call feature over Firebase, enabling learners and mentors to communicate directly inside the app.
- Integrated an in-app chatbot that lets users ask questions and get instant guidance on platform features and learning topics, improving onboarding and day-to-day engagement.

Aditya App – Campus Information & Feedback App | *Dart, Flutter, Firebase*

- Built a mobile application that surfaces Aditya college information – courses offered across B.Tech, Pharmacy, Diploma, and other programs with per-program details, placement statistics, and campus information – backed by Firebase authentication and Firestore.
- Added a review/comment feature letting students share feedback about the college in-app.
- Produced a clean, accessible UI optimized for a broad student user base with varying device profiles.

EDUCATION

Aditya Engineering College **2022 – 2025**
Bachelor of Technology in Computer Science and Engineering *Surampalem, Andhra Pradesh*

Aditya Polytechnic College **2019 – 2022**
Diploma in Computer Engineering *Surampalem, Andhra Pradesh*

ACHIEVEMENTS

- Secured Rank 6 in AP-ECET 2022 (Andhra Pradesh Engineering Common Entrance Test), earning lateral entry into B.Tech CSE.
- Secured first position in the Appathon competition conducted at Aditya Engineering College.
- 5-star problem solver on HackerRank; 2-star coder on CodeChef – consistent practice in data structures and algorithms.
